User Guide

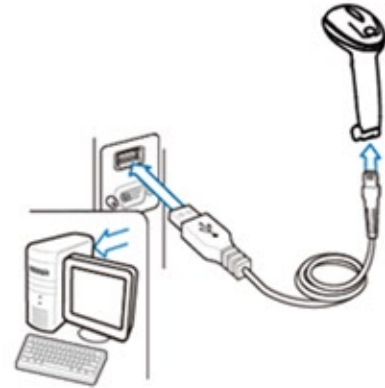

IDZOR 2D Image barcode scanner

About the product

IDZOR TECHNOLOGIES CO., LTD scanners are a universal tool for scanning linear and two-dimensional bar codes, focused on low and medium market segments. Due to the competitive price, outstanding performance, ergonomic design and optimal functionality, IDZOR barcode scanners meet the requirements of a wide range of users in various fields of activity.

Connecting the scanner: connect the cable to the scanner and the computer or laptop, then you can use the scanner.

To optimize working performance of scanner, use the most common barcode types in retail: UPC, EAN, Code 128, QR, PDF417.
